SUMMARY

Backend-focused full stack engineer with 1.5+ years of experience shipping production healthcare and communication platforms using **Node.js, TypeScript, MongoDB, and AWS**. Strong in **real-time systems** (video/voice calling, live webinars, AI voice agents), asynchronous job processing, and cloud deployment. Comfortable owning features end to end, from API design to production debugging.

TECHNICAL SKILLS

Languages & Backend: TypeScript, JavaScript, Python, Node.js, Express.js, REST APIs, WebSockets, RBAC

Frontend: React.js, Next.js, Redux, RTK Query

Databases & Queues: MongoDB, SQL, Firebase Firestore, Redis, BullMQ, Schema Design, Query Optimization

Real-Time & AI: ZEGO, AWS IVS Real-Time, Twilio ConversationRelay, Firebase Cloud Messaging, AI Voice Agents

Cloud & AWS: EC2, S3, Lambda, API Gateway, IAM, VPC, Route 53, CloudWatch, SNS, SQS, SES

DevOps & Deployment: Docker, Docker Swarm, Kubernetes, Terraform, Ansible, GitHub Actions, Jenkins, CI/CD, Nginx, Load Balancing, PM2, Linux, Vercel, Render

Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

MERN Stack Developer

Apr 2026 – Present

JPLoft Software Pvt. Ltd.

Jaipur, India

- Built backend APIs, business workflows, and admin functionality in **Node.js, Express.js, TypeScript, and MongoDB** for **Kinnect** and **MedConcerns**, two healthcare platforms serving web and mobile clients.
- Developed real-time one-to-one and group voice/video calling with **ZEGO**: invitations, ringing, accept/decline, timeouts, busy handling, reconnection, room management, and cloud recording.
- Integrated **AWS IVS Real-Time** for live webinars, covering stages, host/attendee access, encoder configuration, live-session controls, and recording lifecycle with access control and metadata handling.
- Built an **AI-powered voice calling system** with **Twilio ConversationRelay** and **WebSockets**, streaming telephony audio to backend services for real-time caller-to-AI conversations; added configurable agent prompts, voice, and call settings so businesses can tune agents without code changes.
- Moved heavy work off request paths using **Redis** and **BullMQ** background jobs and event-driven push notifications via **Firebase Cloud Messaging**.
- Deployed and supported services on **AWS EC2** with Docker, Nginx, PM2, load balancing, and CI/CD; diagnosed production issues across API latency, database connectivity, upload limits, real-time SDK behavior, and notification delivery.

MERN Stack Developer

Feb 2025 – Mar 2026

OweBest Technologies Pvt. Ltd.

Jaipur, India

- Developed production web applications with **Node.js, Express.js, React, Redux, and MongoDB**, including REST APIs, authentication, role-based access control, transaction logging, and third-party integrations.
- Delivered healthcare and business modules: React admin panels for users, content, transactions, email templates, and FAQs, plus CMS, KYC workflows, and reporting.
- Designed MongoDB schemas and optimized queries for reliable performance under production load.
- Built a serverless file-upload platform using **Terraform, AWS Lambda, API Gateway, S3, IAM, CloudWatch, SNS, and GitHub Actions**.

EDUCATION

Bachelor of Technology, Computer Science and Engineering (IoT)

2020 – 2024

Raj Kumar Goel Institute of Technology

Ghaziabad, India

CERTIFICATION

DevOps and Cloud Computing – Physics Wallah Skills

[View Certificate](#)
